

Nhat (Johnny) Dao

(913) 432-8888 | Shawnee, KS | JohnnyMDao@gmail.com | github.com/daojohnny39

TECHNICAL SKILLS

Programming Languages: Python, C/C++, JavaScript, HTML/CSS, SQL (PostgreSQL, SQLite)
Frameworks & Libraries: FastAPI, Django, pandas, NumPy, Matplotlib
Databases: SQLite, PostgreSQL, Django
Developer Tools: Git, VS Code, Visual Studio, XCode, IntelliJ
Operating Systems & Scripting: UNIX/Linux command line, Bash scripting

EXPERIENCE

ASSET Research Lab Assistant Mar. 2025 – Present
University of Missouri - Kansas City *Kansas City, MO*
• Built a 146-question, 21-section React/Vite/Express survey app with shared TypeScript schemas, conditional logic, autosave, and CSV export.
• Curated a 1,061,562-item Claude Code corpus across 3 substrates: skills (1,030,755), MCP servers (25,052), and plugins (5,755).
• Ran 3-classifier severity analysis on 127,986 rich items; reported L3 rates of 1.96% skills, 0.66% MCP, and 4.17% plugins.

Center of Excellence in Spatial Computing (Micro-Credential) Sept. 2025 – Oct. 2025
University of Missouri - Kansas City *Kansas City, MO*
• Explored geospatial data concepts using Python, R, and open-source analytic tools.
• Acquired foundational knowledge of applying AI and ML in spatial computing with AR/VR.
• Used Unity programming for AR/VR with integrated AI/ML techniques.

PROJECTS

CourseTrack | *React/Vite, Node.js/Express, SQLite, JWT*
• Built a React/Vite coursework organizer with dashboard, course, assignment, schedule, login, and Canvas settings pages.
• Implemented Node.js/Express REST APIs for auth, courses, assignments, semesters, events, stats, and protected routes.
• Added SQLite persistence, JWT authentication middleware, ICS calendar sync, and encrypted token handling.

Cabin Rental Reservation Web App | *HTML, CSS, JavaScript, Python (FastAPI), SQLite*
• Built a FastAPI/SQLite cabin-rental app backed by 11 database tables, 8 HTML templates, and 55 cabin listings.
• Added login/registration, 69-amenity search, price sorting, date booking, and 4 seasonal pricing rules for 0%–40% discounts.
• Worked on a 4-person team; delivered architecture/database design, setup docs, and user docs.

Web-Enabled Database Programming | *Python (Django), HTML/CSS, JavaScript, SQLite/PostgreSQL*
• Completed 5 Django projects/labs across 80 Python files and 14 HTML templates using MVT architecture.
• Built URL routing, model-backed pages, login/contact flows, and CRUD-style customer/inventory workflows.
• Managed relational data with SQL queries and Django ORM; documented setup.

COURSEWORK

Basic Data Structures using C++ Jan. 2023 – May 2023
Johnson County Community College
• Implemented linked lists, binary search trees, and 3 sorting algorithms (bubble, insertion, merge).
• Analyzed time and space complexity using Big O notation.

Database Management Aug. 2022 – Dec. 2022
Johnson County Community College
• Practiced writing SQL queries for data sorting, filtering, and relational operations.

Algorithms and Complexity (CS 404) Jan. 2026 – May 2026
University of Missouri - Kansas City
• Analyzed Big O time and space complexity across 3 sorting algorithms.
• Built a React/FastAPI visualizer for Bubble, Merge, and Quick Sort with comparison and swap/write traces.

EDUCATION

University of Missouri - Kansas City Jan. 2025 – CURRENT
Computer Science - Bachelor of Science - 3.8 GPA *Kansas City, MO*

Johnson County Community College Aug. 2020 – Dec. 2024
Computer Information Systems - Associate of Applied Science *Overland Park, KS*
